

# Atrenta Lanka is Hiring!

*Join the awesome team behind SpyGlass®, an Atrenta innovation*

## Company profile

**Atrenta** is a leading provider of SoC Realization solutions for the semiconductor and electronic systems industries. As the largest private electronic design automation company, Atrenta provides a comprehensive SoC Realization solution that delivers higher quality semiconductor IP, predictable design coherence, automated chip assembly and improved implementation readiness. Its SpyGlass®, GenSys® and BugScope™ products open the way for broader deployment of system-on-chip (SoC) devices in the marketplace, improving time to market, reducing implementation costs and lowering risk. With over 200 customers, Atrenta enables the most complex SoC designs in the world.

**Atrenta Lanka** operations started in 2011. Atrenta Lanka is one of the fastest growing product development centers of Atrenta Inc. It provides excellent opportunities to learn and work on complex SoC designs as part of the EDA industry. With a hot startup environment, it has immense scope for growing and nurturing talent.

## We are Hiring For

- Programming in C/C++
- Compilers, data structures and algorithms
- Optimization techniques
- Digital design concepts
- Verilog, VHDL & SystemVerilog

## We Look For

We need highly talented engineers to work as part of our software development and design teams. We are looking for engineers who are:

- Holders of a BSc/MSc. in Electronics and Computer Science
- Technically bright
- Analytically minded
- R&D oriented
- Self motivated

## First class salary & benefits packages

- Pay package: Best in the industry
- Superb training and a supportive, friendly working environment
- Every opportunity and encouragement to succeed and progress to senior levels
