- Ananda College, Colombo 10 (1999-2007)
- St. Aloysius College, Galle (1994-1998)

Project Experience

Management Information System for *HJS Condiments LTD*

- Participated in the developing process of the web based information system for the HJS Condiments LTD where it is mainly consisted of two components.

- First one was for analyzing the crops and the other component was for processing of farmer payments. Developed the first component for analyzing their gherkin crops they receive from farmers, identifying the defects of the crops and their percentages and the graph generation according to supplied crops.

- Secondly we worked on developing the farmer payments component where it calculates the due payments considering the farmer costs which need to get deducted by each farmer. **I have been actively involved in analyzing the business requirements, database designing and the development process** in relation to this project.

- Technologies we used were **PHP, MySQL, jQuery, JavaScript and HTML.**

- Our group was specially appreciated by the management of HJS Condiments LTD for this product which is currently being used by them.

Web based Information System for Faculty of Graduate Studies

Second year group project – Web based information system for the Faculty of Graduate Studies, University of Colombo. Application form handling and results processing have been totally computerized under this project where all these works had been carried out manually by the Faculty of Graduate Studies. The project has been developed using the **Drupal** Content Management System. Apart from Drupal we also used some other technologies such as **PHP, MySQL Database Server**, **jQuery** and **JavaScript.**

Industrial Experience

Internship Training at *IFS R&D International (Pvt.)Ltd, Sri Lanka*
(2nd April 2012- 30th September 2012)

- Developed a special software named 'Attendance Manager' especially for EST (Extended Support Team) team to track their arrival time and departure time where it summarizes the overall punctuality, completion of 9 hour shifts, and total over time hours of employee etc. as both in forms of excel sheet and graphical mode. Technologies used were Visual C# and MS Office API.

- Involved in the project of automation of the leave application process of employees, in collaboration with 'IFS Biz' software. Technologies used were Visual C#, MS Office API, Oracle PL/SQL, WPF and Access Provider API (.NET) etc.

- Contributed in adding new changes and making modifications in the software used by the management of EST such as Transport Planner, Expense Claimer and Salary Manager.
